

PERC 2021 Presentations

Contributed Poster Presentation Abstracts

- Abdurrahman, Fatima, [Objectivity, culturelessness, and apoliticism: how cultural beliefs prevent the advancement of equity in astronomy graduate programs](#)
- Abraham, Yohannes Medhanie, [Exploring student conceptual resources about heat and temperature](#)
- Adams, Adrian, [Investigating Students' Process of Data Cleaning](#)
- Allen, Scott, [Student perceptions of pre-assessments: "It's basically just guessing anyways"](#)
- Ametepe, Joseph, [Error propagation employed to establish error bounds in projectile motion lab](#)
- Amin, Bahar, [Reflective Journaling in the Era of COVID](#)
- Anthony, Adam K., [Undergraduate learning assistants and the transition to online learning](#)
- Ayouz, Mehdi, [An experience-based course of quantum mechanics: Numerical experiments ranging from stepwise potentials to wave packet propagation and perturbation th](#)
- Bajracharya, Rabindra, [Student understanding and applications of infinity in physics and mathematics](#)
- Bauman, Lauren C, [Centering physics faculty ideas about resources-oriented instruction](#)
- Becker, Dr. Sebastian, [Gaze pattern analysis to reveal student difficulties in interpreting kinematic graphs](#)
- Becker, Dr. Sebastian, [Using mobile eye tracking to capture joint visual attention in collaborative experimentation](#)
- Bennett, Michael, [Transitioning to Online Learning in an Informal Physics Program](#)
- Bergeron, Paul, [Towards an analytic framework for characterizing student use of models](#)
- Beverly, Nancy, [Variations on Effort Grading in Introductory Physics for Life Science – Lessons Learned](#)
- Bloodworth, Dylan, [Investigating the connection between course grades and student participation in research-based assessments](#)
- Borish, Victoria, [Student Engagement with Modeling in Multi-Week Student-Designed Lab Projects](#)
- Bottomley, Ewan, [Gender effects in perceived recognition as a physicist and physics identity](#)
- Bradbury, Forrest R, [Using the Assessment Rubric for Physics Inquiry for open inquiries in a multidisciplinary lab course](#)
- Bralin, Amir, [Undergraduate students' and graduate teaching assistants' perceptions of engineering design in introductory physics](#)
- Breakall, Jared B., [Faculty perceptions of grade 7-12 math and science teaching as a career: Evidence from a reduced-basis factor analysis of the PTAP.HE Instrument](#)
- Bridges, Bill, [Identifying epistemic games in faculty discussions about values in science](#)
- Brundage, Mary Jane, [Evolution in student conceptual understanding of electricity and magnetism](#)
- Buncher, John B., [Bias on the Force Concept Inventory across the intersection of gender and race](#)
- Burkholder, Eric, [Epistemological framing and strategy use during answer-checking](#)
- Byrd, John, [Characterizing Learning Gains in a Two-Year College Embedded Research Course](#)
- Campbell, Jennifer, [Understanding the Efficacy of Machine Learning for Coding Practices](#)
- Campos, Esmeralda, [Comparing students' understanding of Gauss's and Ampere's laws with field sources in square-like symmetries](#)
- Canright, Jared P, [Developing expertlike epistemologies about physics empirical discovery using virtual reality](#)
- Cao, Ying, [Shared Resources in Student Problem-Solving of Spherical Unit Vectors](#)
- Cardona, Pedro, [Access to opportunities affects physics majors interest and choice of methods specialization](#)
- Cervantes, Bianca, [An Overview of Quantum Information Science Courses at US Institutions](#)
- Chastain, Raymond, [Students with Disorganized Study Habits Benefit from Cognitive Prompts During Online Video Lectures](#)
- Chen, Eliran, [Combining expert- and cluster-analysis for Group-level personalization](#)

Chen, Zhongzhou, [Measuring the level of homework answer copying during COVID-19 induced remote instruction](#)

Chini, Jacquelyn, [Explicating Universal Design for Learning-aligned instructional practices for postsecondary STEM](#)

Coffie, Camille, [Disciplinary tensions in applying Universal Design for Learning to postsecondary STEM](#)

Conlin, Luke, [Supporting and Studying Introductory Physics Students' Algebra Skills with Solve-It](#)

Corsiglia, Giaco, [Online Tutorials for Middle-Division Quantum with Adaptive Guidance](#)

Crossette, Nathan, [Comparing undergraduate and graduate student reasoning on a conceptual entropy questionnaire](#)

Cueva Vera, Pablo J, [A Student-Centered Understanding of the Impacts of Environmental Inequities on Teaching and Learning during Remote Instruction](#)

Cwik, Sonja, [Women have lower physics self-efficacy controlling for grade even in courses in which they outnumber men](#)

Degtiareva, Vera, [Pedagogy in practice: exploring the use of pedagogy course knowledge by learning assistants](#)

Doty, Constance, [GTAs' Use of Pedagogical Skills during a Remote Mixed-reality Simulator Training Session](#)

Doucette, Danny, [Challenges of building an inclusive community of learners in the physics lab](#)

Ehrlich, Gabriel S., [Seeking physical/mathematical coherence by recruiting and reconciling reasoning: A case study in E&M](#)

El-Adawy, Shams, [Development of Physics and Math Faculty during Online Professional Development Experience](#)

Elhady, Yasmene Wang, [Effects of facilitating collaboration in large-enrollment introductory physics courses](#)

Engblom, Samuel, [Studying the Learning Assistant Experience at the University of Illinois Urbana-Champaign](#)

Erukhimova, Tatiana, [Impact of informal physics programs on female university students](#)

Fiedler, Brett L., [Multimodality and inclusion: Educator perceptions of physics simulation auditory display](#)

Fischer, Christopher, [Interplay between physics self-efficacy, calculus transfer ability, and gender](#)

Fitts, Thomas, [Supporting Students in Exploring Alternative Lines of Reasoning](#)

Fracchiolla, Claudia, [Computational practices in introductory science courses](#)

Frank, Brian, [Making use of FCI-ACT Correlations to Communicate the Impact of Course Reform](#)

Franklin, Maxwell, [Examining reasons undergraduate women join physics](#)

Gambrell, Justin, [Identifying important computational skills in introductory physics: An interview analysis](#)

Garcia, Tyler, [The effect of value-focused discussions on scientists' ethical reasoning](#)

Gavrin, A., [Preliminary efforts to evaluate an initiative introducing computation across the undergraduate physics curriculum](#)

Genz, Florian, [Naïve concepts of aerodynamic lift – data lessons from different \(learning\) cultures](#)

Gifford, Katherine, [Seeking coherence and switching reasoning after forgetting an equation](#)

Gire, Elizabeth, [Student Reasoning with Completeness Relations in Quantum Mechanics](#)

Good, Melanie L., [Creating honest and fair remote introductory physics assessments](#)

Green, Colin, [Sentiment analysis of faculty responses: transition to online learning](#)

Griston, Molly, [When the light bulb turns on: motivation and collaboration spark the creation of ideas for theoretical physicists](#)

Gutmann, Brianne, [Building Nuance in Classroom Conversations about Ethics, Science, and Society](#)

Hahn, Kelby, [Teaching Relative & Overall Phase with the Arms Representation](#)

Hamerski, Paul C., [Dispositions and mindset in computation-integrated physics](#)

Hansen, Brynna, [Identifying student resources for understanding linear momentum](#)

Hart, Reginald, [Analyzing laboratory teaching practices through the lens of student ownership](#)

Hass, Christopher A. F., [Community Roles for Supporting Emerging Education Researchers](#)

Henderson, Rachel, [Developing an Instrument to Assess the Next Generation Science Standard Practice Planning and Carrying out Investigations in Preservice STEM Teachers](#)

Her, Pachi, [Physics students and matrix multiplication: evaluating their interpretations](#)

Hernandez, Jessica, [From land acknowledgments to action: highlighting the need to engage with Indigenous history in physics teaching](#)

House, Lindsay, [Power of the people: Using citizen science to power big data astronomy](#)

Hu, Peter, [Using a clicker question sequence to teach time-development in quantum mechanics](#)

Huynh, Tra, [Physics teachers' framings of the relationship between equity and antiracism](#)

Ibrahim, Bashirah, [Students' sensemaking of sequential synthesis physics problems](#)

Ikehara, Adam, [Recruiting Future Philly Physicists](#)

Indukuri, Sadhana, [Developing a framework to characterize the feedback that Learning Assistants give to faculty](#)

Ives, Joss, [A Critique of the use of student pairs as the unit of analysis when examining self-sorting for group learning activities](#)

Jambuge, Amali Priyanka, [Conceptualizing Assessments in PER Informed by Explicit Feedback for Instructors](#)

Jaramillo, Sara, [Investigating causal inference difficulties with a simple, qualitative force-and-motion problem](#)

Justice, Paul, [Impact of introducing mathematical reasoning on students' understanding of quantum optics](#)

Kargal, Sejal, [Reimagined Virtual Upper-Division Physics Laboratory Experiences in Response to the COVID-19 Pandemic: Findings from User Experience Testing](#)

Keebaugh, Christof, [Student difficulties identifying diagonal operators for degenerate perturbation theory](#)

Khong, Hien, [Senior undergraduate students developing and envisioning possible selves after graduation](#)

Kinnischtzke, Meghan, [Investigating relationships between emotional states and self-efficacy, agency, and interest in introductory labs](#)

Kohnle, Antje, [Student difficulties with quantum uncertainty in the context of discrete probability distributions](#)

Kumar, Sailakshmi, [Practices in an online computational class of high school teachers](#)

Lane, W. Brian, [Comparison of student and instructor reasons for using computation](#)

Lassen, Ira Ché, [Student ownership and understanding of multi-week final projects](#)

Li, Yangqiuting, [How learning environment predicts students' physics grades and motivational beliefs in introductory physics courses](#)

Lindell, Rebecca, [Not Quite Face to Face: Conducting Qualitative Phenomenographic Interviews Virtually](#)

Liu, Dan, [A study of undergraduates' understanding of vector - decomposition of forces on inclined planes](#)

Liu, Jerry, [Scalable, pencil-and-paper homework with metacognitive student outcomes and minimal instructor time](#)

Logan, Savannah, [A comparison of student perceptions of the teaching profession at minority-serving and non-minority-serving institutions](#)

Longo, Francesco, [Monitoring the wave phenomena learning process through Bayesian updating activities](#)

Lopes, Jomar, [Exploring Experiences, Benefits, Challenges, and Dynamics in a Developing Learning Assistant Program](#)

Mackessy, Grace, [Comparing student conceptions and construction of while loops in modeling motion](#)

Madsen, Adrian M., [Using the PhysPort Data Explorer to analyze research-based assessment results](#)

Malespina, Alysa, [To whom do students believe a growth mindset applies?](#)

Maries, Alexandru, [A cross-sectional analysis of physics self-efficacy, perceived recognition, interest and identity of physics majors](#)

Marshman, Emily, [Student difficulties with the basics for a system of non-interacting identical particles](#)

Mason, Andrew J., [Attitudes toward Physics Problem Solving: In-Person vs. Hybrid Instruction"](#)

Mathis, Clausell, [The Role of Physics Culture in Shaping In-Service Physics Teacher Identities and Framings of Equity: Two Case Studies](#)

May, Jason M, [Students' productive strategies when generating graphical representations: An undergraduate laboratory case study](#)

Mays, Mikayla, [Supporting student construction of alternative lines of reasoning](#)

McDermott, Liam, [What students gain outside the classroom: Using Social Network Analysis to understand the role of affinity-based professional groups](#)

McInerney, Alistair, [Examining the efficacy of a professional development assessment tool](#)

Mellen, Jillian, [Predictors of faculty sentiment on their transition to online teaching](#)

Meyer, Josephine, [Investigating students' strategies for interpreting quantum states in an upper-division quantum computing course](#)

Moore, Christopher, [Modification and Validation of the Teaching Practices Inventory for Online Courses](#)

Munsell, Jeremy, [Using natural language processing to predict student problem solving performance](#)

Murray, Jeffrey W., [Analyzing and Interpreting Data in Physics Class for Future Elementary Teachers](#)

Myers, Carissa, [Identifying Threats and Supports to Self-Efficacy Using Mixed Methods Research](#)

Nissen, Jayson, [Societal Educational Debts Due to Racism and Sexism in Calculus-based Electricity and Magnetism Courses](#)

Noga, Adi, [Teachers' awareness of aspects of experimental design: the case of multimeters](#)

O'Donnell, Christine, [Culturally Responsive Astronomy Education: Using a Critical Lens to Promote Equity and Social Justice](#)

Oleynik, Daniel, [Examining physicists' perspectives of career viability and knowledge of impairment](#)

Oliver, Kristin, [Understanding combinatorics challenges in an upper-division thermodynamics course](#)

Olsen, Joe, [Characterizing social behavior patterns in teaching assistant interactions with students](#)

Ortega, Lizette, [An investigation of how instructors choose to implement the Learning Assistant \(LA\) pedagogy course and their motivations](#)

Osborn, Timothy Kyle, [Inequity in North Carolina High School Physics Outcomes: Gender and Race](#)

Ota, Shuya, [New observable to identify key answer options in Brief Electricity and Magnetism Assessment for improving students' learning](#)

PERC 2021 Author Index

Abdurrahman, Fatima N.: 15, 486
Abraham, Yohannes M.: 21, 166, 486
Adams, Adrian A.: 270, 486
Adams, Wendy: 57, 239
Allen, Scott E.: 27, 486
Alsultan, Jawaher: 371
Alvarado, Carolina: 491
Ametepe, Joseph: 486
Amin, Bahar: 486
Ansell, Katherine: 468
Anthony, Adam K.: 486
Arielle-Evans, Acacia: 221
Ayouz, Mehdi: 486
Bajracharya, Rabindra: 486
Barniol, Pablo: 178
Barth-Cohen, Lauren A.: 270, 462
Basara, Randeep: 450
Bauman, Lauren C.: 21, 33, 166, 191, 486
Becker, Sebastian: 39, 486, 486
Bennett, Michael: 486
Bergeron, Paul D. O.: 45, 486
Beverly, Nancy: 486
Bloodworth, Dylan: 486
Borish, Victoria: 486
Botello, Jesus: 160
Bottomley, Ewan: 51, 486
Bradbury, Forrest R.: 486
Braden, Sarah K.: 462
Bralin, Amir: 486
Breakall, Jared B.: 57, 239, 486
Brewe, Eric: 135
Bridges, Bill: 486
Brundage, Mary Jane: 63, 486
Bumbacher, Engin: 111, 154
Buncher, John B.: 69, 486
Burkholder, Eric: 486
Byerley, Cameron: 491
Byrd, John: 486
Caballero, Marcos: 245, 438
Callan, Kristine E.: 402
Campbell, Jennifer: 486
Campos, Esmeralda: 178, 486
Canright, Jared P.: 75, 486
Cao, Ying: 81, 486
Cardona, Pedro: 87, 486
Cervantes, Bianca: 93, 486
Chastain, Raymond: 486
Chen, Eliran: 486
