PERC 2022 Presentations

Collaboration Space Abstracts

Lindell, Rebecca, Help! I am at a Primary Undergraduate Institutions; how do I include undergraduate research students into my research?
Pollard, Benjamin, Queer Affinity Space / Discussion Space
Quichocho, Xandria R., Indigiqueer: Recognizing the Relationship Between Indiginenity, Queerness, and Research

Contributed Poster Presentation Abstracts

Abdurrahman, Fatima, A case study of cultural change: learning to partner with students
Akinyemi, Abolaji, Interdisciplinary perspectives on evaluation strategies
Akubo, Mark O., Exploring students' negotiation of lab roles through positioning
Alesandrin, Anne T., Identifying student resources for reasoning microscopically about heat and temperature
Amaral, Camila Manni Dias do, Qualitative Social Network Analysis of Women and LGBT+ professional physicists
Amaral, Camila Manni Dias do, Social Network Analysis in Physics Education Research: A Brief Review
Anderson, Austin, Coding Expediently: A Computationally Situated Epistemic Game
Atherton, Tim, Creating a LGBTQ+ Resource Letter for the Physics Education Community
Atherton, Tim, Disciplinary Inquiry in Computational Physics
Atkins, Leslie, Developing an assessment of physics teacher preparation programs: DASI-P
Barbato, Lyle, Registered reports: An impromptu proposal for undergraduate PERC submissions
Bennett, Ridge, Analysis of Physics Students' Subfield Career Decision-Making Using Social Cognitive Career Theory
Bergeron, Paul, Creating Learning Environments Where Students Can Put their Knowledge to Use
Beverly, Nancy, Optional Reflections as Metacognition and Reassessment Opportunities
Bickel, Jessica, Utilizing Perusall Collaborative Reading to Facilitate Learning in Introductory Physics
Borish, Victoria, Seeing quantum mechanics: The role of quantum experiments
Bott, Theodore E., Examining how problem design relates to computational thinking practices
Boyd, Lily, Validation of a key components framework for characterizing informal physics programs
Braden, Sarah, Methods to Enact Culturally Sustaining Pedagogy and Explore Refugee Teens’ STEM Identity Work in a Physics Afterschool Program
Bridges, Bill, Identifying Epistemic Frames in Faculty Discourse Concerning Value-Laden Discussions around Ethics
Brundage, Mary Jane, Peer interaction facilitates co-construction of knowledge related to quantum mechanics formalism and postulates
Burkholder, Eric, Investigating the role of student preparation on cooperative grouping in an active learning classroom
Campbell, Jennifer, Using IBM’s Watson to automatically evaluate student short answer responses
Cao, Michelle, Student Interactions and Group Dynamics within Reformed Introductory Physics for Life Science Laboratory (IPLS) Courses
Carroll, Gregory T, A National Survey of Physics Graduate TA Preparation
Cervantes, Bianca, Modified color frames for analyzing group interactions during an online quantum tutorial
Chahal, Harshna, Comparing Qualitative Interview Methods for Students with Disabilities
Changstrom, Jessica, Using communities of practice to explore departmental values
Chicas, Eve, Physics major course model mathematical preparation: math methods courses in physics vs. other models
Chini, Jacquelyn, Synthesizing disabled physics students' pathways to access: a call for more access talk
Christman, Elaine, This study examined the relationships among gender, membership in racial and/or ethnic groups underrepresented in engineering, and persistence in eng
Close, Eleanor, ADH... Disorder?
Coble, Kim, Students’ Experiences with a Cultural Cosmology Project in an Upper Division Writing Intensive Course for Astronomy Majors
Coffie, Camille A., Identifying Academic Ableism: Case Study of a UDL-Learning Community Participant
Corbo, Joel C., Introducing the Departmental Action Leadership Institute and its preliminary outcomes
Corpuz, Edgar, Students’ views on the use of collaborative group work in introductory physics courses
Corsiglia, Giaco, Effectiveness of an online homework tutorial about changing basis in quantum mechanics
Countryman, Colleen, Assessing the efficacy of a new online game and simulation to teach electric fields
Crossett, Nate, Social network analysis of student collaboration in pandemic-affected courses
Cummings, Karen, A Successful secondary implementation of SQILabs: Observed developments in attitudes and experimental process skills in a reformed first-year course
Cwik, Sonja, Women have lower physics self-efficacy controlling for grade even in courses in which they outnumber men
Daane, Abigail, How Perceived Objectivity in Physics Impacts Cultural Relevance in Teaching
Dachille, Frank Thomas, Trajectories Transfer Students follow to reach a Bachelor's Granting University
Dalka, Robert P., Exploring faculty's explanations of enrollment issues: where does responsibility and control reside?
Dancy, Melissa, White male physicists sense-making around equity in STEM
Dela Paz Maca, Vanessa, The Banking Model in Physics Education
Descamps, Ian, A case of productive confirmation framing in an introductory lab
Dew, Matthew, So Unfair it's Fair: Equipment handling in remote versus in-person introductory physics labs
DiCaro, James, Long-term assessment of computational activities in an astronomy course
Doucette, Danny, Measuring the impact of conceptual inquiry-based labs
El-Adawy, Shams, Personas for supporting physicists engagement in informal education
Emigh, Paul, Finding Derivatives from an Equipotential Graph
Engblom, Samuel, How an LA’s prior student experience can ground their teaching
Erukhimova, Tatiana, Impact of supplemental resources on student outcomes in introductory electricity & magnetism
Erukhimova, Tatiana, Improving out-of-field preparation of high school physics teachers
Euler, Elias, Trends in the prevalence and presentation of video data in PRPER and JLS
Felker, Zachary, Using a Planning Prompt Survey to Encourage Early Completion of Homework Assignments
Fischer, Christopher, Inverse Correlation Between Calculus Proficiency and Calculus Self-Efficacy in Introductory Physics
Fittswood, Thomas, Insights from an intervention designed to support consistent reasoning
Fitzgerald-Russell, Madison, Queering qualitative STEM education research: One researcher’s experience
Flores, Mark, Factors influencing help seeking and help avoidant behaviors among physics and life science majors
Forte, Shanize, Rethinking derivations: The loading of reality into enactive equations
Fox, Michael, Expectations of how student views on experimental physics develop during an undergraduate degree
Franklin, Maxwell, Developing a Python tool to categorize motivation of undergraduate women
Fung, Andy, “Rules without a Reason”: ODEs in a concept image framework
Fussell, Rebeckah K., Machine learning for automated content analysis: characteristics of training data impact reliability
Gaitán, Claudia Carolina García, Approach to the study of optics with primary school students
Garcia, Tyler, Examining Physicists' Ethical Reasoning: A Case Study
Gavrin, Andy, Evaluating Changes in Students’ Self-Efficacy Regarding Computational Tools and Methods
Geiger, Jon M., Developing a natural language processing approach for analyzing student ideas in calculus-based introductory physics
Good, Melanie, Psychological threat and demands in an introductory physics class
Griston, Molly, Students' use of consistency checks while sensemaking in inquiry-based labs
Guthrie, Matthew W., Supporting effective and inclusive group work in introductory physics courses: Development of a guide for instructors
Gutmann, Brianne, Leveraging Hispanic-serving institutions within physics education research
Hass, Christopher A. F., How can PERers support emerging community members’ self-efficacy?
Hatcher, Chase, Social Network Analysis of a Physics Faculty Online Learning Community
House, Lindsay R, Dark Energy Explorers - Using Citizen Science to enhance the Hobby-Eberly Telescope Dark Energy Experiment (HETDEX)
Hu, Peter, Development, validation and virtual and in-person implementation of clicker question sequence on quantum measurement uncertainty
Hubenig, Katelynn, Exclusionary fields or departments?: undergraduate degrees for women of color
Hull, Michael M., A progression of pre-service teachers towards deep curricular knowledge (the Pieces model in Open Source Tutorials)
Hutchison, Paul, Equity and off-task discussion in a collaborative small group
Huynh, Tra, Physics teachers integrating social justice with science content
Ibrahim, Cynthia, Exploring Benefits, Challenges, and Relational Dynamics in an Expanding Learning Assistant Program
Indukuri, Sadhana, Characterizing the feedback that learning assistants give to faculty
Izadi, Dena, You pick my brain and I'll pick yours: a pilot case study of research-practice partnership in an informal physics space
Justice, Paul, Impact of mathematical reasoning on students’ understanding of quantum optics
Kaufman, Grant, Student attitude changes and curricular benefits from two instructional interventions
Kelly, John, Examining student reasoning: A replication study with students at a Historically Black University
Khong, Hien, Undergraduates develop professional future possible selves after graduation
Kuchibhotla, Adithya, Teaching physics in a prison: lessons learnt
Kushimo, Tunde, Investigating students’ strengths and difficulties in quantum computing
Kustina, Jonathan, Learning To Teach, Teaching to Learn: Peer Coaches and Metacognition
Kustusch, Mary Bridget, Connecting the cognitive and discursive aspects of mathematical sensemaking in student discussions of the photoelectric effect
Lane, W. Brian, Creating a computational playground in high school physics
Lang, Dawson T., Investigating the effects of course structure on students' sense of belonging and course performance
Laverty, James T., A New Paradigm for Research-Based Assessment Development
Le, Anneka, Navigating group work in computational projects: Case studies using self-assessments
Li, Yangqiuting, How inclusiveness of learning environment predicts students’ physics grades and motivational beliefs in introductory physics courses
Lindell, Rebecca, The Advantages and Disadvantages of Virtual Qualitative Interviewing
Ma, Guofu, Scientific Argumentation in a High School Algebra-based Mechanics Classroom
Mack, Lillianna, Evaluating Patterns Across Educators in their Reflection of Computational Thinking
Maldonado, Danielle, The Relation of Personality to Science Identity

533
Malespina, Alysa M., *To whom do students believe a growth mindset applies?*

Maries, Alexandru, *Upper-level students’ conceptual understanding of energy and momentum*

Mason, Andrew J., *Reworking exam problems to incentivize improved performance in upper-division electrodynamics*

Mathis, Clausell, *Exploring stereotype threat and imposter syndrome among physics teachers*

McColgan, Michele, *Developing Augmented Reality Modules to Teach Physics*

McDermott, Liam G. E., *Introducing political disability identity as a framework for studying disability in physics*

McEnroe, Brendan, *Impact of Response-Shift Bias on Students' Sense of Relevance*

Mehdi, Ayouz, *Quantum Technology Learning Toolbox (Q TecBox)*

Meredith, Dawn, *Development of questions for the Fluids Conceptual Evaluation (FCE)*

Meyer, Josephine C., *Investigating student interpretations of the differences between classical and quantum computers*

Moore, Christopher, *Reliability and Validity of an Introductory Physics Problem-Solving Grading Rubric*

Myers, Carissa, *A Mixed Methods Approach Towards Defining A Student's Ranges of Self-Efficacy*

Nissen, Jayson, *Socio-metacognitive experiences in a course for future teachers*

Ochoa, Cecilia E., *Investigating students’ fluency with quantum ideas in the context of interaction-free experiments*

Oleynik, Daniel, *The Epic and the Tragedy: Narratives of a Disabled Physics Student*

Oliver, Kristin, *Student experiences of authentic research in a remote, introductory course-based undergraduate research experience in physics*

Olsho, Alexis, *Characterizing covariational reasoning in physics modeling*

Parobek, Alexander P., *Exploring science and engineering students’ guiding epistemologies when addressing first law problems across disciplinary contexts*

Patterson, Zac, *Quantum Physics Education Research: A bibliometric analysis of QPER at the secondary level*

Pawl, Andrew, *Claims, Evidence and Reasoning in the Introductory Mechanics Lab*

Phillips, Jeffrey A., *Using problem-posing tasks to assess physics students’ metacognition and self-efficacy*

Piatek-Jimenez, Katrina, *Investigating underrepresented students’ choice of a physics major*

Pina, Anthony, *Student-Constructed Eigenvalue Equations in Quantum Mechanics: Symbolic Forms and Mathematical Sensemaking Analysis*

Pollard, Benjamin, *Preliminary results from ungrading in intro physics classes*

Porter, Christopher D., *Creating a modular, workforce-relevant undergraduate curriculum for quantum information science and engineering for all people*

Porter, Christopher D., *Graduate student understanding of quantum mechanical spin*

Porter, Christopher D., *Tracking Graduate Admissions During COVID-19: Year Two*

Prefontaine, Brean, *Examining community of practice formation within a new informal art and physics program*

Pressler, Paige, *Insights into Student Metacognition from Reflective Writing in an Introductory Studio Physics Course*

Ramírez Díaz, Mario Humberto, *Professional profiles and teacher training of Physics teachers in Latin America*

Rasool, Chaudhry Nicolas Gibran, *Semiotic resources and their relationship in physics and broadly in STEM Problem-solving*

Riihiluoma, William D, *Applying a symbolic forms lens to probability expressions in upper-division quantum mechanics*

Rodgers, Jacob, *Understanding physics identity in computationally integrated physics classrooms*

Rosen, Drew, *Uncovering the role of affective factors in student reasoning in physics*

Ryan, Qing, *How student’s interest can affect their performance in introductory physics*

Sabo, Hannah Christine, *Challenges of preparing secondary STEM pre-service teachers in computational thinking*

Sachmpazidi, Diana, *Changing the culture: Documenting shifts in a department's norms around data use*
Salmani, Fatema Al, Assessing Thinking Skills in Free-response Exam Problems: Pandemic Online and In-person
Sammons, Amber, Comparison of expert-like attitudes and scientific reasoning skills
Santana, Lisabeth Marie, Investigating experiences of women of color in physics and astronomy
Satoh, Naomi, Exploring identity formation of ethnic and gender minorities in physics
Sayer, Ryan, Impact of combining pre-class reading with peer instruction on learning quantum mechanics
Schwartz, Megan, Nevertheless, she persisted: the importance of student persistence in computation integrated physics classrooms.
Searle, Benjamin, Investigating Interactions Between Students and TAs/LAs in a Reform-Based Introductory Physics Laboratory
Seiden, David, Creating a Dictionary of Task Responses from an ESM survey
Shafer, Devyn, Study Strategies in the Transition from High School to College
Sharkey, Daniel P., Investigating the Effect of Discipline in Mixed-reality STEM GTA Training
Sirnoorkar, Amogh, Analyzing Students' Sensemaking with Algebraic Inequalities
Smith, Trevor I., Analyzing Multiple-Choice-Multiple-Response Items Using Item Response Theory
Solorio, Christian, Discrete and Continuous Challenges in Quantum Mechanics: A Reflective Interview
Sowles, Em, Using metacognitive prompts to explore student reasoning trajectories
Stump, Emily M., Student views of what counts as doing physics in the lab
Sundstrom, Meagan, Students’ varying responses to instructor prompts for frame shifts in physics labs
Swirtz, Madison, Queering methodologies in physics education research
Sword, Astra, Is my bias your bias?: The variability of demographic gaps in the 'good degree rate' for UK physics degree programmes
Taylor, Joinéé, Studying pedagogical practices in physics through the lens of epistemic (in)justice
Topdemir, Zeynep, Student reasoning about partial derivatives in divergence and curl in vector field graphical representations
Totah-McCarty, Andrew, Physics Quantitative Literacy of High School STEM Teachers: Resources and Opportunities
Trucks, Jesica, Exploring the different social learning environments of online and in person planetarium shows
Verostek, Mike, Making expert cognitive processes visible: planning and preliminary analysis in theoretical physics research
Vignal, Michael, Affordances of Articulating Assessment Objectives in Research-based Assessment Development
Webel, Max, Case studies of computational thinking practices displayed by introductory physics students
Weihs, Julien-Pooya, Cloud microphysics: a concept map for studying, instruction, and analysis
Werth, Alexandra, Engagement in collaboration and teamwork using Google Colaboratory
Wheatley, Christopher, Growth of West Virginia STEM Education Network
Wilcox, Bethany, Methods for utilizing Item response theory with Coupled, Multiple-Response assessments
Wilcox, Bethany, PERLOC feedback and questions
Willison, Julia, Causal mapping analysis of Universal Design for Learning-aligned instructional changes
Willison, Julia, How do you eat an elephant? How problem solving informs computational instruction in high school physics
Wood, Laura, Analyzing and Representing Observational Fieldnotes through Sketching
Wu, Xian, They're not buying what we're selling: comparing student-requested supports with instructional practice during group work
Yang, Juan, Comparing introductory physics courses in the US and China
Young, Nicholas T., Using blogs to make peer-reviewed research more accessible
Young, Tamara G., Nepantla in Physics Education Research
Young, Tamara G., Students’ use of symmetry resources when sensemaking about magnetism
Zamarripa Roman, Brian, Nuanced explorations of personal support networks: a cross-case analysis
Zhang, Muxin, Challenges and Successes in reconciling different ideas during group work
Zich, Raymond, Investigating introductory student difficulties reading electric field diagrams
Zimmerman, Charlotte, Assessing physics quantitative literacy in algebra-based physics: lessons learned
Zoechling, Sarah, Uncovering Students’ Types of Interest in Physics
Zohrabi Alaee, Dina, A qualitative analysis of concept maps through the Research Experiences for Undergraduates (REU) programs.

Custom Format Abstracts
Ansell, Katie, Navigating privilege and constraints in early career positions
Mueller, Sara, Mini Book Club
Odden, Tor Ole Bigton, Machine learning methods in PER: Intuition and methodological discussion
Zich, Raymond, Benefits of Solo PER and Strategies to Encourage and Support it. A Roundtable Discussion

Plenary Abstracts
Dockendorff, Kari, Beyond the Binary: Critically Queer Approaches to Quantitative Research in Education
Kattari, Shanna Katz, Quarks are a bit queer: Rethinking known truths from a queer mindset
Leyva, Luis A., “We can’t just turn that off and then do some physics”: A counter-storytelling analysis of introductory physics as a white, cis-heteropatriarchal space
McNeill, R. Taylor, Leveraging queer epistemic subjectivity to advance justice through physics teaching

Symposium Poster Abstracts
Borish, Victoria, Seeing quantum mechanics: The role of quantum experiments
Corsiglia, Giaco, Effectiveness of an online homework tutorial about changing basis in quantum mechanics
Hu, Peter, Development, validation and virtual and in-person implementation of clicker question sequence on quantum measurement uncertainty
Kushimo, Tunde, Investigating students’ strengths and difficulties in quantum computing
Meyer, Josephine C., Investigating student interpretations of the differences between classical and quantum computers
Riihiluoma, William D, Applying a symbolic forms lens to probability expressions in upper-division quantum mechanics

Symposium Talk Abstracts
Duran, Antonio, Examining the State of Scholarship on LGBTQ+ Students in Higher Education and Implications for Physics Educators
Euler, Elias, Phenomenography in PER
Fitzgerald-Russell, Madison, Queering qualitative STEM education research: One researcher’s experience
Forsythe, Desirée, Disrupting gender and sexuality cultures in STEM: Building new futures and possibilities
Fussell, Rebeckah, Content Analysis at scale: using NLP and neural networks to analyze large quantities of student writing about their approach to experimental physics
Goorney, Simon, The roadmap to a quantum-ready workforce: Activity theoretic analysis of the Quantum Technology Education community
Green, Colin, Applying Natural Language Processing to COVID Transition Surveys
Odden, Tor Ole Bigton, Using LDA to thematically analyze PER literature
Odden, Tor Ole Bigton, Using computational essays to support student agency in physics
Svensson, Kim, A short introduction to using Social Semiotics and Variation Theory of Learning in PER
Young, Nicholas, Using random forests to study physics graduate school admissions

Workshop Abstracts
Atherton, Timothy, Queering Computation
Fitzgerald-Russell, Madison, Living Within the Intersections
Gutmann, Brianne, The Water Closet: Ungendering Bathrooms
Vignal, Michael, LGBTQ+ 101
